Name	Type	Used In
	VALUE	LABEL
	1	Have not been tested for HIV recently.
	2	Have mentioned concerns about their risk for HIV.
	3	Engage in sexual activity with partners whose HIV status is unknown.
	4	Expressed interest in learning more about HIV prevention, HIV testing, or PrEP.
	5	Expressed fear, anxiety, or avoidance of traditional HIV testing services (e.g., clinic-based testing).
	6	Have limited access to healthcare services (e.g., no regular healthcare provider, lack of insurance, or transportation barriers).
	7	Have experienced stigma or discrimination related to HIV, sexuality, or sexual health, which may deter them from accessing traditional testing services.
	8	Have disclosed having a partner who is living with HIV.
	9	Mentioned experiencing symptoms that may be associated with a new HIV infection (e.g., fever, sore throat, swollen lymph nodes, rash, or unexplained fatigue).
	10	Have mentioned engaging in sex work or exchanging sex for money, goods, or services.
